

4.3-inch TFT Digital Under Vehicle Inspection Mirror Camera

Scope of application:

Ideal inspection mirror for inspecting cars, machines, warehouses, schools, factory equipment or other areas that are difficult to see directly, it can be used for airport security, parking inspection, military area inspection, personal private car inspection, etc.

Features introduction:

The display uses a 2.65 million color TFT digital screen. Exclusively developed the driver board, which has powerful functions such as image left and right conversion and 5 times electronic dimming. Make your pictures more realistic and colorful. The camera adopts SONY, CCD sensor, and 3-5 meters infrared, so that you can use it normally even in the dark. The aircraft-style triangular wheels make your operation easier and more comfortable to use.

Product Specifications:

Working voltage: DC12V
Working current: 220mA

Specifications: 4.3-inch TFT digital LCD screen

Resolution: 320*240

Horizontal resolution: 420 lines

Power supply: rechargeable and environmentally friendly lithium battery

Camera: Using SONY CCD sensor

Lens viewing angle: 120° wide angle

Infrared distance: 3 to 5 meters
