

Hidden antenna gate

Introduction:

1. EAS hidden buried AM anti-theft security antenna
2. Equipped with advanced DSP system control (wd-999)
3. Fast reaction speed, high efficiency, accurate recognition, low false alarm rate
4. Simple installation, strong anti-interference, large promotion range
5. Suitable for high-end shopping malls, supermarkets, clothing stores goods anti - theft

Appearance and features:

1. A main machine can be equipped with 3 buried brackets, which can detect a 6-meter-wide channel
2. Made of ABS high-strength environmental protection materials, with anti-corrosion, waterproof and anti-pressure characteristics, buried in the ground for 10 years will not rot and deformation
3. Innovative design concept, 360 degree folding, volume reduction of 50%, convenient transportation, save shipping costs
4. External stereo buzzer, three types of alarm sound available
